

## Scale

Scale limits plants and animals

Like your bones couldn't hold ya - uh huh

If you were the size of a shopping mall

Well then Gravity would fold ya

Nature has different rules as the scale system changes

Many unexpected and beautiful

But we cannot grow or shrink to the extreme ranges

'cause Galactic or the nanoscale is too cruel

(What's galactic or the nanoscale to you?)

Could I be the size of a miniature train?

Well no, metabolism's seizin' – uh huh

When a butterfly is the size of an airplane

Then that butterfly'd be freezin'

Setae setae small hairs on a gecko's feet

Van der Waals forces say their climbing can't be beat

And if they were bigger, Danielle

They wouldn't adhere so well
